Grounded discovery and adaptation S

Equal-weight geometric mean across four conditions; higher is better (0-100).

Snapshot 2026-09-12T20:27 UTC | Ended runs, including runs with errors | 95% CIs conditional on the fixed dataset pair.
S: joint whole-run bootstrap; I: Wilson-based MOVER. NA = unavailable; absent intervals indicate insufficient runs/evidence.

Label-by-surprise interaction I (pp)

(Focal EU - SU) - (Focal EM - SM); positive = larger surprise penalty with recognizable labels.
